# About Company

Tshawekazi Projects is a 100% black female owned private company with a Level 1 BBBE status. The company was established in 2012 with the sole purpose of developing entrepreneurs and creating new employment opportunities. The company has grown since and evolved into one of the leading service providers to both the private and government sectors.

We operate in all the 9 provinces in South Africa with our main offices based in Johannesburg, South Africa. In our years of existence we have assisted government departments and private companies implement and monitor projects in various industry sectors. We specialize in project monitoring and evaluation, SMME development and entrepreneurial skills training, coaching and mentorship.

We pride ourselves in our collective qualifications, skills, expertise and experiences which ensure the success of all our partners. All services and projects are done in an analytical, well researched and professional fashion.

Our processes and procedures are adapted to any company's /organization's unique needs

# Welcome Message

We are delighted to extend a warm and heartfelt welcome to you as we embark on this journey of growth, innovation, and collaboration. At Tshawekazi Projects, we are not just a company; we are a dedicated team of individuals driven by a common purpose – to make a meaningful impact on our community and the broader South African economy.

Since our inception in 2012, we have remained steadfast in our commitment to empowerment, diversity, and entrepreneurship. As a 100% black disabled female-owned private company with a Level 1 BBBEE status, we have not only overcome challenges but have flourished, transforming ourselves into a versatile "Generalist Company." This evolution allows us to provide goods and services across various sectors of the economy.

Our footprint extends to all nine provinces of South Africa, with our main offices situated in the vibrant city of Johannesburg. We take pride in our collective qualifications, skills, expertise, and experiences, which form the bedrock of our success. It is through these strengths and our unwavering commitment to excellence that we have fostered enduring partnerships and created new employment opportunities.

# In 2012, **Tshawekazi Projects successfully executed an ICT project.**

We were sub-contracted by Mthinthe Communications PTY Ltd for a project of setting up and installing Cyberlabs and telecentres based at schools across SA, precisely in the Eastern Cape province. The scope of work was to set-up the classrooms assigned for each school cyberlab installation of the 40 PCs/Desktops that were to be used by learners and the teachers.

Installation and implementation of servers, installation of projectors and their screens, installation of air-conditioners, installation of network points, set up the PCs and installation of the OS and any other software programs that were to be used (MS Office, AntiVirus, Internet, Backup Solution) and making sure that they are able to share information via the server and the shared folders created with access rights for both the teachers, learners and administration staff. This was done for more than 10 schools that we were assigned to do in the province. Each school cyberlab was set-up to have 40 PCs/Desktops, a server, networking, internet access, a projector with it's screen and an aircon.

The project was such a success that even today all the schools that we put the IT Infrastructure and setup the Cyberlabs & Telecentres are still functioning even today and Tshawekazi is proud to have been part of a project that brought about change in the rural areas.

# Our Projects

## Royal Fields

The project was setup to support the development of small, medium and micro enterprises (SMMEs), and promote black economic empowerment, entrepreneurship and job creation through affordable access to finance, technical and mentorship support and expertise. The project supports successful black economic empowerment enterprises through a combination of loans and equity funding at affordable rates.

## Akwandze Agricultural Finance

The project was aimed at integrating small to medium scale black sugarcane farmers into the mainstream value chain in the Nkomasi area in Mpumalanga. This was achieved by recapitalizing the irrigation infrastructure, which resulted in the rehabilitation of 10,000 hectares of sugarcane lands. Akwandze extend favourable loans to these farmers, allowing them to access production inputs.
